Meta description (152 characters) Fresh, nutritionist designed office meal delivery in Dubai. Plans from AED 99 a day, one invoice, delivered to DIFC, JLT, Business Bay. Get a quote today.

STICKY TOP BAR Logo links to nutrichef.ae. Nav includes Menu, Why us, Community, FAQ, Contact, See plans, plus a new Corporate Plans link pointing to this page. Trust line center: "Dubai Municipality approved, 80+ meals weekly." WhatsApp button right, visible on every scroll position.

SECTION 1: HERO (above the fold) Keywords targeted: office meal delivery Dubai, corporate meal delivery Dubai

H1: How Dubai offices are saving up to AED 3,000 a month and getting their team back from lunch in 20 minutes flat

Paragraph (subhead): [Nutritionist designed](#) Healthy meals delivered to your office in DIFC, Business Bay, JLT and Downtown. From AED 99 a day. One invoice. Zero delivery apps. Built for offices that want a proper lunch solution, not another subscription nobody manages.

Primary button: Get my office quote on WhatsApp Secondary button: See pricing Microcopy under buttons: Reply within the hour, no sales call needed

Right column: photo of an office team eating fresh meals at their desks.

SECTION 2: TRUST BAR No heading, five short trust markers in a row. Dubai Municipality approved. HACCP certified kitchen. Nutritionist led by [Dr. Fatima Al Hashimi](#). Bagasse eco packaging. Serving DIFC, JLT, Business Bay, Downtown.

SECTION 3: THE REAL PROBLEM (pain points, laid out honestly) Keywords targeted: office lunch delivery Dubai, corporate lunch catering Dubai

H2: Your team is losing two hours a day to lunch, and it is costing you more than you think

Paragraph: Between the heat outside, the walk to find food, and the wait once they get there, most Dubai offices lose close to two hours a day per employee to lunch. Over a month that adds up to nearly a full extra working week per person, spent standing in a queue instead of at their

desk. But the time loss is only part of the problem. Here is what office managers actually tell us they are dealing with before they switch to a proper meal service.

Six specific pain points, each with a short explanation underneath, no heading tags but bolded lead words:

The heat makes walking to lunch genuinely unpleasant for six months of the year, so people either skip proper meals or order in individually, which brings its own mess of separate receipts.

A mixed workforce of fifteen or twenty nationalities means no single restaurant or fixed menu keeps everyone satisfied, so complaints about "the same boring food" build up fast.

Finance ends up untangling dozens of individual delivery app receipts every month, each with its own delivery fee, service charge and tip, none of it consolidated into one clean expense line.

Dietary restrictions, halal, vegetarian, vegan, gluten free, allergies, get handled inconsistently when everyone orders separately, and nobody is actually checking what is in the food your team eats every day.

Delivery riders getting stuck at building security or loading docks in towers like DIFC or JLT wastes time for reception staff who end up managing food logistics instead of their actual job.

Headcount that changes week to week with hybrid work and new hires makes a fixed catering contract feel risky, so many offices avoid switching at all, and keep losing money to the individual ordering chaos instead.

SECTION 4: THE PROMISE Keywords targeted: daily office lunch program Dubai, healthy office lunch Dubai

H2: One fresh meal at every desk by 1pm, one invoice at month end

Paragraph: NutriChef delivers a proper, nutritionist designed meal to your office every working day, [cooked fresh that same morning](#) in a certified kitchen. No delivery apps, no thirty separate receipts for finance to untangle at month end. Just one meal, one invoice, one supplier you can actually call when something needs to change. Every issue listed above, the heat, the mixed workforce, the admin mess, the logistics, the flexibility, is solved by the sections below.

SECTION 5: THE THREE SERVICE MODELS (card comparison) Keywords targeted: corporate meal plan Dubai for small teams, workforce catering Dubai, meal plan for office Dubai

H2: Pick the model that fits your office

Paragraph: Not every office needs the same setup. A ten person startup and a two hundred person tower floor have very different needs, so here is how the three main options actually compare, with real starting prices so you are not left guessing.

Three cards side by side, middle card marked "most popular."

H3: [Individual plans](#) AED 25 to 45 per day. Best for small teams and wellness focused offices that want each employee to choose their own meal.

H3: Daily office lunch program (highlighted card) AED 30 to 65 per day. Best for offices with 20 to 200 staff who want one consolidated lunch service and a single monthly bill.

H3: Bulk workforce catering AED 6 to 25 per meal. Best for large or industrial teams needing higher volumes at a lower cost per meal.

Short line underneath the cards: Not sure which one fits your office. Message us your team size on WhatsApp and we will tell you honestly, even if the answer is a smaller plan than you expected.

SECTION 6: SAVINGS CALCULATOR (interactive) Keywords targeted: office lunch delivery Dubai price per person, corporate catering minimum order Dubai

H2: See how much your office could save

Paragraph: A thirty person office ordering lunch individually through delivery apps typically spends around AED 21,000 a month once fees and tips are counted. The same office on a NutriChef group plan spends closer to AED 18,000, with one invoice instead of thirty and no admin time spent chasing reimbursements. Move the slider below to see your own number.

Slider for team size, 10 to 200. Live output showing estimated monthly saving in AED. Button underneath: Get this quote on WhatsApp.

SECTION 7: HOW WE HANDLE A MIXED WORKFORCE Keywords targeted: halal office lunch delivery Dubai, vegetarian vegan office catering Dubai

H2: Real dietary needs, handled properly, not just listed as a buzzword

Paragraph: Almost every provider says they offer halal, vegan and vegetarian options. What they rarely explain is how they keep a genuinely mixed office happy day after day. Our menu rotates through the week, South Asian dishes on some days, Filipino inspired meals on others, Arabic and continental options in between, so staff from different backgrounds get something familiar more than once a week instead of eating the same neutral tray every day. Every meal is labelled for allergens, and nutrition information is available per dish, which matters if your company tracks employee wellness as part of its own internal reporting.

SECTION 8: WHY NUTRICHEF (EAT proof) Keywords targeted: best office catering company in Dubai for startups

H2: [Why offices trust nutrichef](#) with their team's lunch

Paragraph: Every meal is checked by a qualified nutritionist before it ever reaches your building, every kitchen is properly certified, and every container is designed to break down instead of sit in a landfill for centuries.

Four short proof points in a 2x2 grid, no heading tags: Nutritionist Dr. Fatima Al Hashimi, 12 years clinical and sports nutrition experience across the UAE. Kitchen Dubai Municipality approved, HACCP certified for food safety. [Packaging compostable bagasse](#), no single use plastic, which matters if your company reports on sustainability. Coverage DIFC, JLT, Business Bay, Downtown, Marina, with delivery riders who already know building access rules for each area.

SECTION 9: SOCIAL PROOF Keywords targeted: office meal delivery near me Dubai

H2: What office managers say after switching

Paragraph: Nothing sells a lunch service like the people who no longer have to think about lunch.

Three testimonial cards, each with a quote, name, job title, company, headcount and building or area for local relevance. Below the cards: [See more stories from our community](#)

SECTION 10: GUARANTEE

H2: Try it for one week, cancel free if it is not right

Paragraph: We built the contract so you are never trapped into a service that is not working for your team. Try it for one week, and if your office is not visibly happier with the food, cancel with no fee, no penalty and no awkward conversation with a sales rep. Headcount changes are also reflected in your next delivery cycle, so hybrid teams are never paying for meals nobody eats.

SECTION 11: LEAD CAPTURE FORM Keywords targeted: corporate meal plan Dubai for small teams, office lunch delivery Dubai price per person

H2: Get your office meal quote

Paragraph: Tell us your team size and building, and we will send back a real price within the hour, not a callback booked for next week.

Four fields only: company name, team size, building or area, WhatsApp number. Submit button: Send my quote request Note under form: a floating WhatsApp button stays visible through the whole page as an alternate path for anyone who does not want to fill a form. Links directly to wa.me/971501234567

SECTION 12: FAQ (accordion) Keywords targeted: all question based long tails, how much does office catering cost in Dubai, is office catering tax deductible in UAE

H2: Common questions

H3: How much does office lunch cost per employee in Dubai Paragraph: Individual plans usually run AED 25 to 45 a day, while a full daily office lunch program ranges from AED 30 to 65 a day depending on menu variety, delivery frequency and how much dietary customisation your team needs.

H3: What is the minimum headcount for a corporate meal plan Paragraph: Most offices can start from around ten to fifteen people, though this can flex depending on your building, delivery schedule and the service model you choose.

H3: Can we cancel or pause the plan anytime Paragraph: Yes. Plans can be paused, adjusted or cancelled at any time with no hidden fees, and changes to your headcount are reflected in your next delivery cycle.

H3: Do you provide a VAT invoice Paragraph: Every office receives one consolidated monthly VAT invoice instead of separate receipts for each delivery, which makes reconciliation far easier for your finance team, and we support purchase order numbers if your company requires them for internal approval.

H3: How do you handle different dietary needs Paragraph: Every meal is clearly labelled for allergens, and menus rotate through the week so staff from different backgrounds get something familiar more than once, rather than eating the same neutral dish every day.

H3: How does delivery work in towers like DIFC, JLT or Business Bay Paragraph: We already know the security sign in process, loading dock rules and delivery windows for the buildings we serve regularly, so your reception desk is never stuck negotiating with a delivery rider.

H3: What happens if our team size changes week to week Paragraph: Hybrid teams can confirm numbers a day in advance, so you are never paying for meals that go uneaten on quieter days.

Below the accordion: [Read our full FAQ](#)

SECTION 13: FINAL CTA BANNER Full width colored band, no heading tag. Text: Ready to feed your team properly. Button: [Message us on WhatsApp](#)
